

Master Diagrams

Logic Games

As SIMPLE as possible
while still UNDERSTANDABLE

use the same format
when possible:
things, spaces, rules

write rules the same
way they will appear
in the diagram

A B C D E F G

A-C

$\overset{\curvearrowright}{E}G$

B

\oplus

\triangleright - - - - \triangleleft

$A_3 \rightarrow G_6$

directly on diagram
when possible

leave space between
components for later
additions

in a neat column or row
